

Experience, flexibility and quality time after time.

About SL Pharma Labs

Since 1997, SL Pharma Labs has provided high value drug product development, analytical, microbiological and early phase clinical manufacturing services for parenteral, liquid and topical products. SL Pharma Labs mission is to support clients in meeting product development, analysis, regulatory approval and commercialization timelines and budgetary requirements.

SL Pharma Labs is experienced in working with both large and small molecule focused clients that range from large, multi-national through virtual start-up organizations. The commonality across the client base from innovator drug companies through generic organizations is a desire for efficient collaborative support that is done on time and on budget every time.

What differentiates SL Pharma Labs from other contract research and development organizations?

- » **experienced** scientists and leadership from industry that understand the challenges of drug product development and commercialization processes in today's highly regulated market
- » **adaptive and customized** approach to the unique needs of every client, drug product and project
- » **reliable** partner that is committed to meeting client budget and timing requirements
- » **collaborative** project design and completion from start to finish

SL Pharma Labs has a team of experienced pharmaceutical and biotechnology industry leaders with deep knowledge and commitment to outstanding service. The company's mission is to maintain small, agile project teams that collaborate with clients to assure that all projects are completed efficiently and meeting all project scope requirements.

Facilities

SL Pharma Labs is located in the First State Industrial Park campus which is approximately 35 minutes from the Philadelphia International Airport and 5 minutes from the I-95 Newport exit in Delaware.

The facility houses formulation development, chemistry, microbiology and analytical laboratories, stability chambers, QA storage and clean rooms ranging from Class 100 – Class 100,000. SL Pharma Labs can handle cytotoxic compounds and Controlled Substances Schedules II through V. Additionally, the facility operates under cGMP and maintains a clean record with the FDA since the establishment of the company in 1997.
